Editorial Index to TEC Volume 42 January-December 2001 407

Abbas M, Bullock D and Rhodes A
Comparative study of theoretical, simulation and field platoon data **7.232**

Ahern A
Understanding modal choice **4.108**

Allos A
Equilibrium between supply and demand **6.194**

Bain R
ITS Leeds fears up for 30th birthday **8.264**

Bain R
Cardiff's real-time information system for bus passengers **9.300**

Bain R
Moveable barrier technology – the key to the dynamic highway? **10.340**

Beckett A and Overton D
Update on the Code of Practice for Traffic Control and Information Systems **3.71**

Booth J
What next after VERA? **1.17**

Bradshaw R
Travel plans – supporting their development **6.198**

Carsten O
The prospects for Intelligent Speed Adaptation **2.41**

Cheek G
New standard for fixed vertical road signs **6.188**

Cohen S
The century of mobile data **2.50**

Crawford D
False start for Galileo? **2.40**

Danech-Pajouh Mehdi
Road traffic indicators as a performance guide **9.321**

D'Arcy J and Davis P
The integrated travel information centre in Bristol **9.311**

Debell C
Is ITS entering the delivery cycle? **8.278**

Dix M
Update on London's RUC plans **7.219**

Elvik R
Safety policy priorities in Norway and Sweden **1.9**

Enoch M
Lessons from America – the San Diego HOT lane **8.260**

Enoch M
Workplace parking charges Down Under **10.357**

Evely P
York's traffic congestion management system **8.269**

Fernandez R
A new approach to bus stop modelling **7.240**

Kathmann T and Cannon R
Guidelines for the use of active speed warning signs in Germany **9.304**

Kathmann T and Cannon R
So what do the Germans think of their roads? **11.396**

Goodwin P
Doubts raised about the way the 10 Year Plan measures congestion **5.158**

Gunay B
An overview of the lateral properties of road traffic flow **11.401**

Herrstedt L and Greibe P
Safer signing and marking of horizontal curves on rural roads **3.82**

Holzwarth J, Biesinger A and Funke T
M21 – a telematics-based mobility service for commuter traffic **8.273**

Hoose N
Lighting the way ahead with COMETS **4.140**

Irving J, Turnbull S, Porter S and Kovacevic V
Traffic flow predictions – how accurate are they? **5.172**

Jaensirisak S
Public valuation of road user charging: selfish and social perspectives **7.221**

Kerner B, Rehborn H, Aleksic M and Haug A
Methods for tracing and forecasting congested traffic patterns **8.282**

Kerner B, Rehborn H, Aleksic M, Haug A and Lange R
Online automatic tracing and forecasting of traffic patterns **10.345**

Lillington A
Multi-modal modelling for transport assessments **7.237**

Lum K and Wong Y
Traffic data logging system for red-running violation studies **10.362**

Luomo J and Rama P
Comprehension of pictograms for variable message signs **2.53**

Luomo J, Rama P and McLaverty K
Understanding control strategies and technical features of VM signs **5.168**

Maher M
Stochastic user equilibrium assignment with elastic demand **5.163**

Nazer P Abdul
Density of mixed traffic stream from the speeds of individual vehicles **9.308**

Nittymaki J and Maenpaa M
Use of fuzzy logic in traffic signal control **1.22**

Otlet G
The barriers to change as they are perceived by car commuters **9.315**

Perrin J, Martin P and Hansen B
Integrating network technologies: linking SCOOT and CORSIM **10.351**

Rahmat R, Jumari K, Hassan A and Basri H
Video detection system for traffic light sensor **11.386**

Ratcliff T
Warrington – looking forward to UTMC **6.191**

Rose G, Brownbridge N and Hills P
Modelling the effects of traffic-calming schemes **4.133**

Sanchez de Muniain J
Practical step-by-step pursuit of excellence in Preston **5.160**

Sanchez de Muniain J
Floating data finds commercial champion **10.353**

Schrijnen L
Innovations in the better use of motorways in the Netherlands **3.78**

Stradling S
ISA – who wants it? **4.138**

Sultan B and McDonald M
The lane changing process: data analysis and modelling behaviour **6.202**

Taylor M
The speeds of vehicles involved in fatal accidents **2.44**

Taylor M
Managing vehicle speeds for safety: Why? How? **7.226**

Techie-Menson J
GRIPs – will they work in the United Kingdom? **8.267**

Thompson D
Overview of the design and testing of traffic signals from an electrical perspective **3.74**

Welsh P
Saturation flow – the variable design perameters **11.381**

Wright C
Is ITS the quick fix fairy? **3. 106**

*** The June issue of TEC 2001 was wrongly numbered Volume 43 No 5. It should have been Volune 42 No 6.**
